Moisture, Mold and Mildew:

Vinyl wallcovering functions as a vapor barrier. If water or moisture becomes trapped between the wallcovering and wall cavity, an increased risk of mold may occur. Consult a building design professional on the proper use of vinyl wallcovering.

A mildew inhibiting agent has been added to help protect against fungal and other microbiological growth. No additives however, will prevent mold growth if moisture is allowed to accumulate and its sources are not eliminated.

Further protection against mold growth may be achieved with Versa Permavent[®], a unique microventing technology that literally "breathes," helping manage the mobile moisture in walls.

Warranty:

VERSA is guaranteed to be free of defects in workmanship and material for five years. For additional details on moisture management, Permavent, warranty and other Versa innovations, visit our website at versawallcovering.com.
